## GENEVA TARGET FUND | HARVESTER

As of 9/30/2024

Investment Objective: To provide the highest level of long term return consistent with an emphase on retirement income generation, protection against inflation and lower relative risk.

Investment Strategy: Invests in a diversified combination of mutual and separately managed fund using an asset allocation strategy uniquely designed for investors who desire a conservative investment strategy. Unlike other Target Funds, the Harvester Fund's conservative asset allocation will not change annually, but remain constant year after year.

Investment Risk: While an asset allocation strategy can be a good tool to reduce portfolio volatility, all investments are subject to risk. This includes the Geneva Target Retirement Funds. Geneva Target Funds 2025 - Harvester Fund hold most of the underlying assets in fixed income investments. These fund are designed to generate income with lower relative risk compared to longer dated target funds. Howeve these funds are sometimes subject to prolonged periods of share price fluctuations. Those who are unwilling to accept price volatility should invest in a fund that guarantees a fixed level of income.

## **Target Fund Illustration:**

## YEARS FROM RETIREMENT

At the target date of 2065, the asset mix in this fund is anticipated to be approx, 60% bonds. As illustrated the Equity Glide Path chart, the asset mix will progressively reduce stock exposure and become more conservative until 2075, when it will become fixed at 25% stocks and 75% bonds.

Target Fund Description: Geneva Target Retirement Funds are designed to provide the maximum le of investment assistance for participants who have little interest, time or experience investing in the financial markets. The attraction of the funds is that on-going investment decisions are turned over to an experienced portfolio management team. Its goal is to create a portfolio that is properly diversified and adequately reflects the risk for an investor's current stage of life. Target Funds with dates far out in the future are designed to be more aggressively invested. Over time the fund will gradually become more conservative as investors approach their retirement date and beyond.

To assist our ministry partners, Geneva Benefits Group has designed twelve Target Retirement Funds that reduce the responsibilities of maintaining a portfolio. Each fund has a number within the target fund name (e.g. Geneva 2060). This number refers to the approximate year a participant can expect to retire and begi to gradually withdraw the value of their account in retirement.

The professionals at Geneva Benefits Group regularly monitor and adjust each Geneva Target Retirement Fund to provide investors with greater stability and reduced risk. To select the correct Target Fund for you simply pick the fund that is closest to your anticipated retirement year, and then let the experts at Geneva do the rest.

Past performance does not guarantee future results. Investors should carefully consider each Geneva Core and Geneva Target Fund investment objective, investment strategy, risk factors, expenses and fees before investing. This and other information about the funds can be found in a fund fact sheet or in a prospectus by visiting our website www.genevabenefits.org, or by calling Geneva Benefits Group at 800.789.8765. Read the fund fact sheet or prospectus carefully before investing in a fund. Shares of the Geneva Core and Geneva Target Funds are not deposits or obligations of any bank, and are not guaranteed by any bank, are not insured by the FDIC or any other agency, and involve risks, including possible loss of the principal amount invested. Unaudited Quarterly Information

\*Due to the timing of the release of the NCREIF NFI – ODCE values, the JP Morgan Benchmark Index is an estimate.
